ICONIA TAB W Series

The Acer ICONIA Tab W Series comes in a hybrid design that combines the portability of a multi-touch tablet and the full productivity of a standard notebook. Enjoy hands-on multimedia using the touch capabilities, or attach the dockable keyboard1 to quickly transform the tablet into a mini-workstation.

Hybrid design: touch and productivity

The ICONIA Tab W Series weighs less than 1 kg and is smaller than a magazine. Multi-touch controls make using the tablet fun, while the full-size dockable chiclet keyboard is great for typing. Two 1.3 MP webcams deliver quality chats, and you'll enjoy you up to 4 hours2 of unplugged HD video playback and 6 hours2 of Internet cruising thanks to the embedded Acer PowerSmart long-life battery pack.

Total touch control

Using the ICONIA Tab W Series puts you at the forefront of modern mobility where controls are just a touch away. Launch the Acer Ring to use the touch applications and built-in utilities for out-of-this world experiences. You'll find the user interface a delight; while the handy Device Control Console lets you modify device settings and access peripheral ports and devices from graphical menus.

Cloud consumption everywhere

Enhance how you surf the web by using onscreen gestures to zoom, flip and scroll on TouchBrowser, and collect web clippings on My Journal. Acer clear.fi lets you organize, share and enjoy your favorite media across different devices within your home network. You'll appreciate full web browsing with Adobe® Flash® Player, and relax to the max with preloaded Internet games.

Amazing HD Internet and connectivity

HD videos come alive on the 10.1" WXGA screen, which supports image auto rotation. An HDMI® port connects to projectors and HDTVs for big-screen enjoyment of HD media. A dual-core AMD processor with integrated graphics delivers smooth multitasking and Internet video, while Dolby® Advanced Audio® v2 audio enhancement makes nice sound. A Bluetooth® 3.0 port transfers data ultra fast, and wireless connectivity, plus optional 3G, keep you in touch always.
